Professional Summary

Architect with a degree from the *Escuela Técnica Superior de Arquitectura de Madrid*, Spain (ETSAM, UPM, 2000), bringing over 25 years of freelance and senior architect experience in architectural design, project management, on site supervision and sustainability. Certified as a GSAS-CGP (2016) with advanced BIM expertise, I specialize in delivering innovative, sustainable projects. My three-year tenure as a Senior Sustainability Consultant in Qatar (2016-2019) at the Gulf Organisation for Research and Development (GORD) equipped me with deep insights into the GCC's architectural and sustainability standards.

Professional Experience

- **Freelance architect**

Spain. 2000 – 2016; 2019-2021; 2025

- Delivered comprehensive architectural services, including design, project management, and site supervision, across residential, commercial, and healthcare projects.
- Spearheaded sustainability integration in projects, leveraging VERDE and GSAS expertise to meet environmental and regulatory standards.
- Utilized BIM methodologies to enhance project efficiency, coordination, and delivery for clients.
- Led design and execution of projects, managing budgets, timelines, and client expectations.
- Coordinated with engineers and contractors to ensure technical accuracy and regulatory compliance.

- **Senior architect and on-site supervisor**

TRAGSATEC engineering and project company, Spain. 2021- 2025

- Project management and team coordination for the drafting and supervision of the construction of the new Palma de Mallorca auditorium.
- Project manager and emergency works manager for a unique performance space in Madrid: Las Ventas bullring.
- Oversaw multidisciplinary teams, managed budgets exceeding €11M, and ensured high-quality execution of singular public projects

- **Senior Sustainability Consultant**

Gulf Organisation for Research and Development (GORD), Doha, Qatar, 2016–2019

- Evaluated and guided projects under the GSAS framework, ensuring compliance with Qatar's sustainability benchmarks.
- Provided technical expertise in sustainable design, contributing to high-profile projects in the GCC region.

Education

- **Master's Degree in Architecture**

Escuela Técnica Superior de Arquitectura de Madrid (ETSAM, UPM), Spain, 2000.

Recognized as Level 3 Master MECES, Level 7 European Qualifications Framework (EQF).

Certifications

- Certificate in Artificial Intelligence Applied to BIM (IFC COAM), The Factory School, 2025
- BIM Specialist Course (+200 hours), 2019
- GSAS-CGP (Global Sustainability Assessment System - Certified Green Professional), 2016
